

# X-Lite 4 for Mac Quick Start Guide

## Getting Started

After choosing a SIP VoIP service provider, you will need the following information:

- User name, password, and domain
- Authorization Name (if applicable)
- Firewall traversal and other network information; see “Configuring Accounts” in X-Lite User Guide.

## System Requirements

- Operating System: Mac OS 10.9 or 10.10 operating system software.
- Connection: IP network connection (broadband, LAN, wireless)
- Memory: 2 GB RAM minimum.

## Setting up Accounts

You must set up a SIP account to make phone calls.

1. Start X-Lite if it is not already running.
2. From the menu, choose X-Lite 4 > Accounts. The Accounts window appears.

Sip Account - Disabled

Account name: Account 1

Use for:  Call  
 IM/Presence

General Voicemail Topology Presence Transport Advanced

User Details

\* User ID 1331

\* Domain domainA.com

Password .....

Display name Joseph Santos

Authorization name

Domain Proxy

Register with domain and receive calls

Send outbound via:

Domain  Proxy Address

Dial plan #1\a\a.T;match=1;prestrip=2;

Cancel OK

3. Complete the User Details area with the information obtained from the VoIP service provider.
4. Complete the remaining tabs as specified by the service provider or to suit your setup. Settings that you may need to change immediately include:
  - General tab, Domain Proxy area.
  - Topology tab, if your computer is on a network and/or behind a firewall.For more information, see the user guide.
5. Click OK; the account is created and registered. “Enter a name or number” appears in the call field.

You can now make calls with your new phone. If you have trouble making calls, see the Troubleshooting Assistant: Help > Troubleshooting.
